Application deadline: 9th December 2011

MRCS Course Outline

This new course has been specifically designed to meet the requirements of surgical core trainees who are about to sit the MRCS Part B OSCE exam.

Tutorial/viva-based small-group teaching will cover anatomy, pathology, physiology, critical care, principles of surgery and surgical specialty subjects. Teaching and examination will be provided by senior anatomy, anaesthetic and surgical faculty. Human cadaveric prosections will be used to demonstrate key clinically relevant anatomical topics.

Delegates will be exposed to exam-style OSCE conditions for practice with summative assessment as well as formative feedback opportunities.

The course is limited to a maximum of 16 delegates on application.

£200 course bursaries for Severn Deanery Trainees

Core trainees in the Severn Deanery have the opportunity to apply for a £200 bursary towards the cost of the course.

Five bursaries only are available for the course.

Application for a bursary is available on request in writing to Mr Rob Longman (Chair, Surgical Skills and Courses Committee, Severn School of Surgery) before the course and will be on agreement with the Programme Directors for Surgery-in-General and Trauma-and-Orthopaedic core training. Payment of the bursary will be made by cheque following completion of the full course.
